SWEETS

- Invoicing
- Reminder emails
- Product creation
- Invoice customization
- Language selection with clients in different countries for one organization
- Workflow

- Simple lay out
- Invoice creation and tracking
- Mass customization
- Parent / Child relationship
- Setting up payment portals for customers & general portal management
- Integration with rest of Zoho One module is still clunky

- Ease of use
- Very easy rollout to the entire team
- Streamlined expense reporting
- Integrating invoicing with the CRM
- Mobile app is a little clunky, especially when processing receipts.
- CRM data flow can be slow sometimes.
- Integration with other finance apps, not the greatest.

- Price, for a tool with all these options they offer a great price.
- Access for clients, so you can manage and view multiple clients.
- Good mobile app, easy to use many options.
- Great for entry level, it's so easy.
- While it's great for small business, zsp, it's not that great for bigger companies.
- Many say this, and it's still not there. No payroll module...
